FOR IMMEDIATE RELEASE

NETWORK SUPPORT FOR SMALL BUSINESS JOINS KONECT RESELLER PARTNER PROGRAM

CALGARY, Alberta, October 2, 2006 – desktopsites Inc. (“desktopsites”), a rapidly emerging leader in access serverware for small and mid-size businesses, is pleased to announce the addition of Network Support for Small Business (“NSSB”) to its Konect™ Reseller Partner Program. NSSB is a unique Mobile IT Department providing computer network support and service specifically for small to medium size businesses.

“Computer networks have become mission critical to businesses, and at the same time the most challenging management issue they face,” says John Harris, VP of NSSB and a Microsoft Certified Small Business Specialist. “Staying on top of all of this, while trying to maintain a focus on their core skills and abilities is a day to day battle for a small business. We pride ourselves on our ability to resolve this challenge for small businesses by providing them with the best possible IT solutions, service and support. Upon discovering the valuable Konect solution, we were excited to learn that desktopsites shares the same passion for small businesses. The Konect solution, its pricing and features and their support programs all demonstrate their commitment to providing small businesses with the same capabilities and service that previously only larger enterprises enjoyed.”

“NSSB’s reputation for innovation and service in the small and mid size business market speaks for itself as evidenced by the testimonials of their clients and partners,” said Alex Bethlehem, President and CEO of desktopsites. “With NSSB’s previous experience representing solutions such as Citrix, we feel vindication that Konect delivers an ideal value proposition to the small and mid-size business market that is not found in other solutions on the market today. And with NSSB’s close relationship with Microsoft and our recent acceptance into the Microsoft Certified Program we are looking forward to pushing further into the Small Business Server market and exploring new and innovative solution opportunities.”

About desktopsites

desktopsites is an emerging leader and innovator in on-demand application publishing serverware solutions for small and mid-size businesses globally. desktopsites’ Konect solution enables companies to simply and securely extend network resources and seamlessly publish applications, wherever and whenever they are needed. desktopsites was founded in 2000 and is headquartered in Calgary, Alberta, Canada. For further information visit <http://www.desktopsites.com>.

About NSSB

NSSB brings over 30 years of experience to the process of managing small business networks. Based in Renton, Washington, NSSB network technicians have years of on-the-job experience, which is critical to understanding, installing, training, and maintaining today’s business networks. Because of their experience with small business systems, Microsoft products, and their reputation for excellence in support and service, Microsoft selected NSSB to be one of four companies working to help develop the next generation of Small Business Server. This close working relationship with the Small Business programming staff at Microsoft provides them with extensive hands-on experience and in-depth knowledge of Small Business Server.
