### **FOR IMMEDIATE RELEASE**

## **DAVIS COMPUTING SOLUTIONS JOINS KONECT RESELLER PARTNER PROGRAM**

**CALGARY, Alberta, September 20, 2006** – desktopsites Inc. (“desktopsites”), a rapidly emerging leader in access serverware for small and mid-size businesses, is pleased to announce the addition of Davis Computing Solutions. (“Davis Computing”) to its Konect™ Reseller Partner Program. Davis Computing specializes in providing low cost outsourced IT services and complete network solutions for small businesses with up to 40 users.

“As a reseller of remote access software solutions, we are very familiar with the market and customer needs that a solution like Konect addresses,” explains Bruce Davis, President of Davis Computing. “The other solutions in this space either are too expensive or lack the basic functionality of many businesses in our target market. Konect provides us with the ability to deliver a powerful, cost effective and simple solution where before we had none. It is an excellent match for our current and targeted customer base.”

“With partners such as SonicWALL, Symantec and Citrix in their portfolio and a strong customer base in the lower end of our target market for small and mid size businesses, the addition of Davis Computing as a reseller solidifies Konect’s uniqueness and value in today’s marketplace,” said Alex Bethlehem, President and CEO of desktopsites. “Davis Computing is a very reputable and trusted advisor to the small and mid size business market and they provide the core set of services these businesses need to be successful and competitive. We are certain the strong team at Davis Computing will represent Konect well in the California marketplace and are looking forward to capturing the strong growth potential we see.”
