### **FOR IMMEDIATE RELEASE**

## **CDOT NETWORKS JOINS KONECT RESELLER PARTNER PROGRAM**

**CALGARY, Alberta, Dec 5, 2005** – desktopsites Inc. (“desktopsites”), a rapidly emerging leader in access serverware for small and mid-size businesses, is excited to announce the addition of CDot Networks (“CDot”) to its Konect™ Reseller Partner Program. CDot is a leading network services company specializing in networking, security and systems management for their clients, including many prestigious Fortune 1000 companies.

“Over the past few years there has been considerable growth in the complexity of our client’s end-user computing environments and requirements. Not surprisingly this growth has paralleled a desire to deploy solutions that simplify these environments and the resulting need for more and more end user training and support,” says Chris Day, President and CEO of CDot. “We are excited by the opportunities to assist our clients in realizing this simplification but have struggled to find a solution that delivers a meaningful value proposition. With the addition of Konect to our solution portfolio we can now confidently approach our clients with a solution to simplify application deployment, training and support and ultimately enable them to do more with less. No question, we see a significant market need for Konect and see it as an integral part of our network services portfolio.”

“We are excited to be welcoming such a strong partner and brand into the Konect Reseller Partner Program,” said Alex Bethlehem, President and CEO of desktopsites. CDot Networks is widely regarded and has a strong reputation for delivering superior solutions to their customer base. We see their participation in our program as further validation of the importance that Konect has not only with small and mid-size businesses but also larger companies and enterprises looking for similar application publishing advantages.”

### **About desktopsites**
