FOR IMMEDIATE RELEASE

LNS EST. JOINS KONECT GLOBAL RESELLER PARTNER PROGRAM

CALGARY, Alberta, Canada, Sept 14, 2005 – desktopsites Inc. (“desktopsites”), a rapidly emerging leader in access serverware for small and mid-size businesses, is pleased to announce the addition of LNS Est. (“LNS”) to its Konect™ Global Reseller partner program. LNS offers a wide spectrum of information technology services supporting small businesses. LNS works closely with its clients to understand their needs and provide them with the most economical IT solutions.

“Our analysis with clients has shown a recurring need for software like Konect that can centrally deploy and manage applications in a mixed network environment,” says Dusan Marinkovic, President of LNS. “Like most small businesses that aspire to greater achievements our clients often find themselves building their internal networks on an “as needed” basis with price point as their primary motivator. On smaller networks there is little problem with a mixed operating system environment on the desktop computers. But as the volume of their applications and computers grows, they find their IT requirements and challenges growing exponentially. We see Konect serving a vital role in simplifying these environments.”

“It is exciting to officially welcome LNS as our first European reseller into our Global Reseller Partner Program,” said Alex Bethlehem, President and CEO of desktopsites. “The LNS profile of focusing on mixed network environments to simplify and deploy applications for small businesses is an ideal background for the successful sale of Konect. Working with LNS also opens exciting opportunities for Konect not only due to their European location but also because of their strong client base and exciting prospects for Konect installations. We are looking forward to working with LNS to drive initial growth in Europe.”
