FOR IMMEDIATE RELEASE

INTERWARE SYSTEMS JOINS KONECT RESELLER PARTNER PROGRAM

CALGARY, Alberta, February 22, 2007 – desktopsites Inc. (“desktopsites”), a rapidly emerging leader in access serverware for small and mid-size businesses, is pleased to announce the addition of Interware Systems Inc. (“Interware”) to its Konect™ Reseller Partner Program. Interware is a fully integrated technology services provider to small and medium-sized businesses in Ontario.

“Organizations need confidence not only in their IT providers but also the solutions that they are adopting to manage and drive their operations,” says Scott Cuff, President of Interware. “We continually strive to provide them with this confidence by ensuring the highest levels of customer service and providing the best possible IT options for their needs. We have provided access solutions to our clients but those particular solutions were relatively expensive to acquire, deploy and manage. Konect has proven to be a step above ... simple to deploy and manage, easy to administer, seamless to end users and very cost effective for our clients.”

“The addition of Interware as a Konect reseller is very exciting for us,” said Alex Bethlehem, President and CEO of desktopsites. “Interware is a strong presence in the Toronto marketplace with an excellent client base and a reputable solution set including such offerings as Fortinet™, HP, Juniper®, and their status as a Microsoft® Gold Certified Partner. Interware is also the Developer and ASP of E-registernow a web based on-line registration system with real time secure payment. We are excited by the prospects of taking Konect to market with Interware.”

About desktopsites

desktopsites is an emerging leader and innovator in on-demand application publishing serverware solutions for small and mid-size businesses globally. desktopsites' Konect solution enables companies to simply and securely extend network resources and seamlessly publish applications, wherever and whenever they are needed. desktopsites was founded in 2000 and is headquartered in Calgary, Alberta, Canada.
