FOR IMMEDIATE RELEASE

SBG TECHNOLOGIES JOINS KONECT RESELLER PARTNER PROGRAM

CALGARY, Alberta, April 25, 2007 – desktopsites Inc. (“desktopsites”), a rapidly emerging leader in access serverware for small and mid-size businesses, is pleased to announce the addition of SBG Technologies (“SBG”) to its Konect™ Reseller Partner Program. SBG allows organizations to sole source their entire network infrastructure needs, from hardware, software, and cabling to remote management and on-site maintenance and services to ensure quality deployment, effective management, timely responses and accurate resolutions.

“Every organization is unique and requires different consideration to meet their challenges and needs,” says Cecil Young, President of SBG. “We take great pride in providing end-to-end value to our customers, supporting their planning and strategy right through to maintenance and problem resolution. It takes skilled professionals and quality products, such as Konect, to ensure that our clients are not only satisfied with the solutions they have received but that they are also realizing tangible benefits in their operations.”

“Regardless of the technology provided, people are still the essence of small business,” said Alex Bethlehem, President and CEO of desktopsites. “In the design of Konect we tried to consider these ‘people’ and their needs to ensure we were delivering them the best possible solution for their needs. For administrators, we wanted to give them an easy and straightforward administrative experience. For end users, we wanted their desktop experience not to change even though they were gaining access and capabilities delivered by Konect. For partners like SBG, not only did we want to make the Konect value proposition strong but we also wanted their responsibilities with Konect deployment to be as simple as it was for the other roles.”

About desktopsites
