Work from Home

Access to
applications &
data from home

Does your Business:

- Need to give your users secure, easy and instant access to the applications and data that they need anywhere, anytime in order to maximize sales efforts?
- Need to provide flexible work scenarios, like working from home or on the road, when necessary, or responding to emergencies while on vacation?
- Need to centralize and secure critical data and applications in order to simplify your business operations so you and your employees can save considerable time and effort?
- Need to reduce the cost it takes to satisfy these needs?

Testimonials

"We needed a cost-effective solution to centralize our database and provide remote access to sales reps across the country. We ultimately chose Konect Elite because of its security and also the simplicity of its database management."

Groves International
Mississauga, Ontario
Reseller – Starcomm Technologies

"Konect has allowed us to free up the pc's that our old peer-to-peer solution would use whenever we were working remotely. The secure, fast connection has really improved our productivity, and the simplified management console is proving to be a big time-saver as well!"

Remain Productive. Ensure your users have access to critical applications and business resources... anywhere, anytime, on any device.

The pace of business today has changed workplace dynamics, making time and information your most valuable competitive resources. Your employees and contractors are distributed, working from home, branch offices, overseas or on the road. No matter where they are, they require access to live and often real-time information in order to meet customer and business expectations. Without this timely access to information, you open the door to very real competitive threats as potential customers search out alternatives faster than your employees can respond to inquiries and requests.

Why Konect Elite™?

- **Increase Remote Workforce Productivity and Maximize Sales Potential** – Konect Elite gives your users secure, easy and instant access to the tools and information they need from anywhere at any time on any device, enhancing the quality of services through real-time information flow, regardless of location. This allows your users to respond to customers demands in an expedited way that is sure to give you a higher close rate. *Maximize Results.*
- **Enable Flexible Work Scenarios** – With Konect Elite, users are no longer confined to desktops that are locked to an office, location, or device, which radically improves individual performance and job satisfaction by giving the opportunity to work in more flexible work environments. This can be vital to your business' health and potential for success, especially during unexpected business closures due to natural disasters or unplanned emergencies. *Stay Connected.*
- **Increase Remote Workforce Efficiency** – Konect Elite delivers a seamless and consistent end-user experience from anywhere using any PC, thin client, laptop or netbook, reducing user training needs and support. This will allow your users to focus on completing their required tasks and meeting customer demands, improving overall individual productivity & performance. *Simplify and conquer.*
- **Comprehensive Security Access & Data Protection** – Konect Elite's built-in policy management provides the control IT administrators need to ensure that technologies aren't abused by users, but rather, to allow the appropriate level of access to the right information and business resources your users require. *Maintain Control.*
- **Scalable** – Konect Elite supports your existing Microsoft client and server investments so you can quickly deploy a complete solution that will support both your business's current infrastructure and plans for future growth. *Think ahead.*
- **Affordable** – Konect Elite delivers the core capabilities for all user scenarios at a fraction of the cost of comparable enterprise offerings. *Spend wisely.*

For more information on desktopsites virtualization solutions for SMEs, contact your local reseller or visit our website at <http://www.desktopsites.com>.

About desktopsites - desktopsites is a leading developer of innovative and cost effective desktop virtualization solutions for small and mid-size businesses ("SMEs") across North America and is located in Calgary, Alberta, Canada. Konect Elite extends and enhances the Microsoft virtualization platform, working as an intelligent connection manager in conjunction with Microsoft's virtualization solutions and System Center products to simplify the set-up and management of virtual client environments.
