KONECT FOR MAC

desktopsites is pleased to announce the availability of the Konect Client for Mac OS X. Konect leverages Apple's innovative Aqua interface, offering users an experience consistent with that of other applications running on Mac OS X. Konect for Mac OS X supports versions 10.4.9 or higher and includes both Intel Core and Power PC Clients.

Minumum Baseline System Requirements:

Processor: Intel Core Processor, 50 MHz or faster PowerPC G4, or Power PC G5

Operating System: Apple Mac OS X Version 10.4.9 or higher

Hard Disk: 6 MB of available hard disk space. The hard disk should be in Mac OS Extended format, the default format for Mac OS X

WHY KONECT?

TURNING A COMPANY'S TOUGHEST ACCESS CHALLENGES INTO THEIR BIGGEST BUSINESS ADVANTAGE

Anyone who owns or manages a small business knows how difficult it can be trying to enter orders, bill customers, schedule resources, manage accounts, and generally run line-of-business applications when you leave the main office.

There's no doubt that remote access is a great way to increase employee productivity. But what about the IT Manager who needs to set up the network, keep it secure and maintain all those remote and mobile users?

Starcomm Technologies

www.starcomm.ca

Unlike some other products, it was very easy to become a dts Reseller. My experience with Konect has been a very positive one as the dts team always ensures the satisfaction of my clients. Their support team helps to make client installations incredibly quick and easy", says Sam Azer, owner of Starcomm Solutions. "Konect's simplicity allows a quick connection that eliminates the security and performance issues. The real win for me as a dts Reseller is the manageability of Konect. Why take on a big headache if you do not have to? Konect is proving itself time and time again as a complete solution offering in a rapidly expanding market."

Sam Azer - Starcomm Technologies
Founded in 1999, Starcomm Technologies has been providing the Ontario area with IT solutions and services for a wide variety of clients in a broad range of market industries. Sam's clients were previously relying on combinations of Log-Me-In, RDP, and VPN's. For Sam, common pain points included security issues, slow speed of the connection, and complexity. Upon finding Konect by desktopsites, Inc.(dts), Sam knew immediately he'd found the solution he'd been looking for.

desktopsites Konect Virtual Access Manager (VAM) provides tremendous flexibility and competitive advantage through the ability to deliver critical line-of-business applications, files and data over the Internet to employees in any location, at any time, even for companies with limited IT resources.

Only desktopsites' Konect VAM helps IT administrators overcome the difficulties of trying to deliver critical line-of-business applications, files and data beyond the range of the local network. Konect's unique application delivery approach ensures that applications and other critical business resources are fully, yet securely, accessible outside the main office. Equally important, Konect's management console streamlines IT system administration, providing simplicity of centrally managing, controlling and updating business applications - without having to touch each workstation or rely on the end users to do so. desktopsites Konect VAM allows you to:

- Roll out and manage applications, files and data quickly and easily
- Provide convenient and transparent access from anywhere
- Securely protects and delivers critical business information
- Make a big impact with a very modest budget and very little effort

Start enjoying the benefits of desktopsites' Konect VAM today!

*ASE client of the Virgin Island
Legislature states:*

"After using Citrix for so many years we are happy to have finally found a solution that truly solves our remote access needs within our tight budget. After investigating three or four other vendors, we decided on desktopsite's Konect software because it is cost effective and easy to learn compared to similar products. The fact that Konect is such an easy program to work with and administer was a major advantage - the whole installation took less than an hour!"
