

Konect Elite™ Desktop Virtualization Simplified

Virtualization is revolutionizing the IT industry, and the benefits proven in server virtualization are causing a transformation in the way applications and desktops are being delivered. The traditional static model of providing every user with a complete physical computer is losing ground and giving way to dynamic provisioning of desktops and applications as secure, on-demand services with an optimized user experience whether in the office, on the road, or from a remote location.

At the heart of this revolution desktops' Konect Elite desktop virtualization solution delivers a Microsoft® centric management platform that radically simplifies the set-up, management, delivery and dynamic provisioning of virtual client environments while extending desktop, application and hardware lifecycles.

What is Konect Elite™ ?

Konect Elite is a Microsoft centric desktop virtualization solution which centralizes application and desktop management and delivers Windows® applications and desktops as an on-demand service to any user, anywhere on any Windows® client device (PC, thin client, laptop or netbook).

Konect Elite natively supports Microsoft Windows Server 2008 Hyper-V & System Center Virtual Machine Manager ('SCVMM'), consolidating all physical and virtual resources from these systems into a single centralized management view. desktops' proprietary FlexSpin™ technology then enables the rapid provisioning and deployment of applications (whether TS or RemoteApp) and virtual desktops (VDI) to users dynamically anywhere, anytime, on any device.

How is Application & Desktop Management & Delivery Achieved with Konect Elite™ ?

desktops' proprietary FlexSpin™ technology enables IT to deliver any type of Windows® application, desktop, or any combination thereof, to any user on any Windows® client device. With FlexSpin, IT can manage single instances of each OS, application and user profile and dynamically assemble and provision these resources rapidly. This, in turn, allows IT to deliver individual applications or complete desktops to users based on specific roles and permissions in a way that matches the users' requirements, quickly and securely.

...Because Simplicity is Power

Dynamic Application & Desktop Delivery – Simplify the world of desktop computing by delivering applications and desktops, or a combination thereof, as an on-demand service to any device, anywhere, anytime enhancing the quality of services through real-time information flow, regardless of location.

Single Centralized Management Console - Konect Elite provides a unified, centralized management interface to manage and deploy applications and desktops (whether TS, RemoteApp, or VDI) to users, whether local or remote, dramatically decreasing the time, cost, and effort required to manage these resources.

FlexSpin™ Delivery – Users may require different types of applications or desktops based on their roles in a business. With FlexSpin delivery technology, administrators can dynamically assemble, provision and deliver any type of application or virtual desktop to any user, on any device increasing business agility and radically simplifying desktop management.

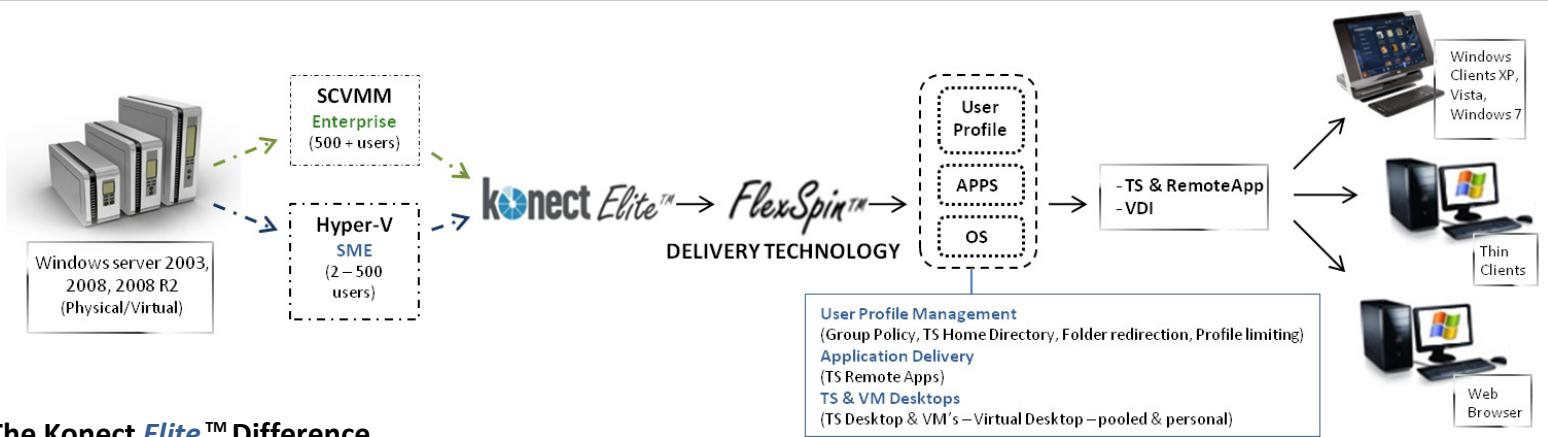

Native Integration with Microsoft Windows Server 2008 Hyper-V & System Center Virtual Machine Manager ('SCVMM') – Konect Elite consolidates physical and virtual resources from Hyper-V and SCVMM into a single centralized management console. From these consolidated resources, Konect Elite's FlexSpin delivery technology then enables the rapid provisioning and dynamic deployment of applications and virtual desktops to users anywhere, anytime, on any device.

Optimize the End User Experience Anywhere, Anytime, on Any Device – Using Konect Elite, users have on-demand access to the applications and information they need when they need it, delivered in a consistent user experience users have come to expect, especially as they roam between devices.

Comprehensive Security Access & Data Protection – Konect Elite's built-in policy management provides the control that IT administrators need to ensure that technologies are not abused by users, but rather, to allow the appropriate level of access to the right information and business resources they require.

Scalability on a Microsoft Platform – Microsoft centric, Konect Elite plugs seamlessly into your customer's existing Microsoft environment, ensuring they get a quick and complete solution set that supports the demand for their immediate business needs and their plans for future growth.

Affordability - Konect Elite delivers core capabilities for all user scenarios at a fraction of the cost of comparable enterprise desktop virtualization solution offerings.

The Konect *Elite*™ Difference

With a Microsoft centric delivery, Konect *Elite*:

- Radically simplifies the set-up, management, delivery and dynamic provisioning of virtual client environments while extending desktop, application and hardware lifecycles.
- Is 100% complementary to the Microsoft virtualization portfolio seamlessly supporting Microsoft Hyper-V and SCVMM. This allows you to leverage your existing Microsoft management skills to drive new Microsoft virtualization solutions to your customers while delivering extraordinary value and customer support.
- Removes the headaches of cost, complexity and training associated with third party competitive virtualization offerings to the Microsoft virtualization portfolio.
- Enables a smooth, rapid Windows 7 rollout while leveraging your clients existing infrastructure investments.

Konect *Elite*™ Editions

Konect *Elite* is available in two Editions, **Standard** and **Enterprise**.

Konect *Elite* Standard Edition: The Konect *Elite* Standard Edition is a simple, cost-effective turnkey desktop virtualization management solution designed specifically for **small and mid-size businesses**. Natively supporting the Microsoft Hyper-V virtualization platform, the Standard Edition radically simplifies the set-up, management, delivery and dynamic provisioning of virtual client environments while extending desktop, application and hardware lifecycles.

Konect *Elite* Enterprise Edition: The Konect *Elite* Enterprise Edition expands on the Konect *Elite* Standard Edition, natively supporting Microsoft Hyper-V and SCVMM, and is **optimized for managing larger scale environments** which require greater scalability, control and visibility for application and desktop (whether physical or virtual) delivery and management.

Konect *Elite*™ System Requirements - Recommended Server Side – Windows® 2003 / 2008 / 2008R2

Computer / Processor	-Pentium III 1 Ghz or higher
Memory	-1 Gig of RAM (recommended minimum)
Hard Disk	-56 MB – Konect Server
Operating System	-Windows 2003 / 2008 / 2008R2 (Standard, Enterprise or Data Center) -Supports domain or stand alone environments -ASP .NET Framework 3.0 -IIS 6.0 or higher (server 2003) -IIS 7.0 or higher (server 2008 / 2008R2) -Remote Desktop Services -Konect Secure Gateway Service (or) RDS Gateway enabled for Remote Access
IP Address	One (1) static &/or dynamic IP address
Digital Certificate	Optional
MS TS/RDS CALS	Required

Client Side – Minimum System Requirements - Recommended

PC Computer	-Windows XP (SP3), Vista, Windows 7 clients
Processor	-Pentium III
Memory	500 MB of RAM (recommended minimum)
Hard Disk	9 MB
Software	Konect Client

About desktopsites

desktopsites is a leading developer of innovative and cost effective desktop virtualization solutions for small and mid-size businesses ("SMEs") across North America and is located in Calgary, Alberta, Canada. Konect *Elite* extends and enhances the Microsoft virtualization platform, working as an intelligent connection manager in conjunction with Microsoft's virtualization solutions and System Center products to simplify the set-up and management of virtual client environments. Konect *Elite* is sold in both a Standard and Enterprise version, delivering a consistent user experience across TS, RDS, App-V and VDI.
