

solutions

... a comprehensive application and desktop brokering, management, access and security solution for the SMB market ...

REDEFINING THE COST AND COMPLEXITY OF APPLICATION AND DESKTOP MANAGEMENT AND DISTRIBUTION IN TODAY'S DISPERSED BUSINESSES

Are today's technology buzz words confusing? *Server Virtualization, VDIs, Presentation Virtualization, Virtual Machines?*

Are you overwhelmed with the lack of time and manpower to investigate new business technologies for remote access and application delivery needs for your clients?

Fear not as desktopsites is soon to deliver one of the most comprehensive application and desktop brokering, management, access and security solutions for SMBs to meet application and desktop management and distribution - whether local or remote.

desktopsites Konect Virtual Access Manager Version 7.1, slated to be released Mid October 2008, is one of the only small to mid size business end-to-end software platforms for Windows application delivery and desktop deployment - all in one complete solution offering - at a price point that makes sense for the SMB market.

desktopsites Konect Virtual Access Manager for hosted desktop virtualization and Terminal Server (TS) application delivery bridges the gap between VDI and Terminal Server server based computing.

By centralizing the application delivery and desktop deployment, desktopsites connection broker will view all server resources for delivering applications and desktops, whether those come from a single user (VDI) or multi-user (TS) systems. This will allow IT administrators the ability to mix and match single instance VDI hosts with a businesses same multi-tier Terminal Server hosts, both for published desktops and applications.

KONECT CLIENT & RESELLER QUOTES

"This Konect drive feature has saved me HOURS of work and works so much better than what I used to have to do in Citrix! This is worth the price alone!"
Lou Melograna, Owner
Starnet Solutions

"By the way, I used konect from Hongkong to get my emails and send directly from sf. Its FANTASTIC and works very well from here. The performance is like I am in the US or even from home. The clients are impressed that I am as connected to them as anywhere and been able to solve problems with the greatest of ease."
Daivid Arrants, Owner
Carefree Computing

"I will be pleased to tell them, as I have many of my clients, about the excellent product (Konect) that you offer, and the exceptional Technical Support that comes with it. The key reason that we deal with your firm is the Technical Support, as you are definitely the best, and work hard to assist my tech's if there is an issue."
Chuck Middleton, Owner
Impact Business Systems

"After investigating a few other vendors, we decided on desktopsites' Konect because it was easy to learn, provided a strong, rich feature set of functionality and is very cost effective for our organization. The product's functionality and flexibility are very impressive and play an important role in providing critical applications and data to our teachers and administrative staff within the organization and remotely, delivering these resources securely in real-time."
Karl Souza, IT Director
Open Meadows Alternative Schools

customers business.

VDI (Virtual Desktop Infrastructure) - term used to describe an entire desktop environment, including operating systems, applications and configurations, reside in virtual machines (VMs) running on servers virtualized by virtual infrastructure software.

Presentation Virtualization - term used to describe server-based computing platforms.

Are you faced with day-to-day challenges of:

- Providing secure, easy, and instant access to applications and data within a businesses daily operations;
- Meeting the end users demand for a consistent access experience to business applications and information;
- Reducing the complexity of delivering and maintaining applications - whether local or remote;
- Increasing data security and controlling access to business information;
- Reducing costs while supporting the businesses expansion and growth needs;
- Ensuring business mobility;

We can help. For more information, [contact](#) desktopsites.

"Konect is working wonderfully. I have nothing but good things to say about the product and the support. Needless to say - I'm extremely impressed and happy with the product, its ease of use and customization."

Brad Stevenson, Vice President
Stevenson Accounting

"Konect has allowed us to free up the pc's that our old peer-to-peer solution would use whenever we were working remotely. The secure, fast connection has really improved our productivity, and the simplified management console is proving to be a big time-saver as well!"

The Art of Dentistry
Reseller: Starcomm Technologies

"We needed a cost-effective solution to centralize our database and provide remote access to sales reps across the country. We ultimately chose Konect because of its security and also the simplicity of its database management."

Groves International
Reseller: Starcomm Technologies

"We wanted the option to work from home or our cottage, and we needed our new remote access solution to be simple to use. We also needed a fast, secure connection, and that's what Konect gave us!"

GRT Genesys
Reseller: Starcomm Technologies
